STUN-E430

Stunner (constant amperage)

Electronic Constant-Amperage Stunner for small plants

- with constant amperage - alreadymeets the coming EU-slaughter directive
- fit for the future: complies not only with the actual but also with the newly planned EU animal welfare regulations for 2011
- LED display for Amperage
- better meat quality
- higher yield due to less blood spots and bone fractures
- ask for our detailed brochure

9 kg 31 lbs

IP 44

STUN-E512

Stunner (constant amperage & high frequency)

Electronic-High-Frequency Constant-Amperage Stunner with Data-Interface for up to 100 stuns per hour

- 7 stun-program-places of which 5 preinstalled and individually adjustable for different animals species / sizes and operating-modes
- programmable, electronic control of all stun parameters
- programs for head and heart-stun (cardiac arrest) selectable
- better meat quality
- higher yield due to less blood spots and bone fractures
- fit for the future: complies not only with the actual but also with the newly planned EU animal welfare regulations for 2011
- acoustic sound for minimum stun-time (adjustable)
- LED-display for program-No, voltage, ampèrage etc,
- 4 keys for selection of stun program and programming (password protected)

recorded details:

- amperage reached in 1st second ?
- minimum-stun-time (4s) at minimum amperage reached (in Améreseconds separately for head & heart) ?
- Error Yes/No per parameter
- integrated interface for data-storage
- external Datamemory STUN-EMEM01 (please order separately) saves up to 6000 stuns
- ask for our detailed brochure

14 kg 31 lbs

IP 44

STUN-E514

Stunner (constant amperage & high frequency)

Fully programmable electronic stunner for continuous operation with trap or restrainer

- programmable, electronic control of all stun parameters
- 7 stun-program-places of which 5 preinstalled and individually adjustable for different animals species / sizes and operating-modes
- programs for head and heart-stun (cardiac arrest) selectable
- better meat quality
- higher yield due to less blood spots and bone fractures
- fit for the future: complies not only with the actual but also with the newly planned EU animal welfare regulations for 2011
- acoustic sound for minimum stun-time (adjustable)
- LCD-display for program-no., voltage, amperage etc.
- 6 keys for selection of stun program and programming (password protected)
- transformer with increased ampérage (2,5A)
- second output socket for heart electrode
- remote control output for pneumatic stun-tong
- printer interface including data-recorder
- ask for our detailed brochure

16 kg 35 lbs

IP 44

STUN-TONG-EPP

Electro-Stun-Tong, pneumatic

3 kg 6,6 lbs

- for use in stun traps or in a restrainer
- significant relief of the operator by pneumatic closing process

STUN-TONG-H2B

Head to Back Stunner handpiece

2 kg 4 lbs

- perfect for stunning in a V-restrainer
- good skin-contact due to water valves near the electrodes
- high animal welfare due to head and heart stun

STUN-TONG-EP

Electro-Stun-Tong for Pigs / Hogs

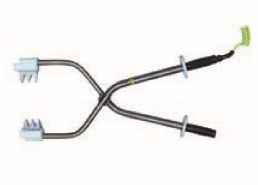

3,2 kg 7 lbs

- wide opening: for head & heart-stun (cardiac arrest)
- combined spike plus middle-thorn electrodes for better skin-contact and prevents slipping for optimized stun- & meat-quality results
- robust design made from high grade stainless steel
- plastic rings around arms avoid bruising of fingers
- wear-resistant spiral-cable

STUN-TONG-EA

Electro-Stun-Tong for Sheep

3,2 kg 7 lbs

Electro-Stun-Tong for Sheep, Lamb & Goat

- wide opening: for head & heart-stun (cardiac arrest)
- extra-long spike electrodes for optimized skin-contact even through the wool
- plastic rings around arms avoid bruising of fingers
- robust design made from high grade stainless steel
- wear-resistant spiral-cable

STUN-TONG-EF

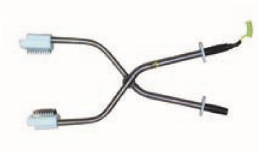

Electro Stun Fork for Pigs

- for use in stun traps or in a restrainer

STUN-TONG-ES

Electro-Stun-Tong for Breading-Sows / Mother-Pigs & Boars

3,8 kg 8,4 lbs

- stronger tubes & extra wide opening also for cardiac arrest
- combined spike plus middle-thorn electrodes for better skin-contact and prevents slipping for optimized stun- & meat-quality results
- plastic rings around arms avoid bruising of fingers
- robust design made from high grade stainless steel
- wear-resistant spiral-cable
